

Peer Evaluation Form

Team Number:

3

Please type the names of all of your group members, including yourself, and rate the degree to which each member fulfilled his or her responsibilities in completing the group project on the following scale:

0 1 2 3 4
Did little or no work Did their fair share of work

These ratings should reflect each individual's level of participation, effort, and sense of responsibility, not their academic ability.

Name	Rating
Serop Kelkelian	4
Shadan Amini	0
Dominic Watson	4
Tate Halsey	4

Comments:

Serop Kelkelian: I solved and wrote the entire analysis, wrote everything LaTeX wise, and fixed previous minor errors.

Shadan Amini: Did absolutely nothing the entire semester. Rarely showed up to class and when he did, he did not pay attention. Offered ZERO help during analysis process for each checkpoint. Only wrote part of the first two checkpoints into LaTeX, but we had to write it all for him because he did not understand it. He literally copy and pasted it into LaTeX, not even reading it to check if the sentence made sense. I remember seeing simple spelling mistakes proving that he didn't retype or reread what he put into LaTeX. Never replied after the 2nd checkpoint and left the group unannounced. I had a "confrontation" with him in the process of writing the 2nd checkpoint into LaTeX. He spent two days "working" on the report and had only put in the title page. I told him prior to starting that he could use Sanders' template. He started from scratch. At that point, I told him "Bro imma be honest, you have done basically nothing". He replied, "Yeah lol." It took him two days to figure out he could start from your template and by then I finished the analysis for the second checkpoint and started writing the report in LaTeX. I have screenshots of the discord conversations if you need them. I can't say enough negative things about this group mate and if I had more time, I would write an essay about every experience with him.

Tate Halsey: Helped with MATLAB code and a small portion of the analysis. Fixed the convergence study error.

Dominic Watson: Helped with analysis and rewrote portions of introduction and conclusion.
